Sizes of OEM Nail Stickers

Sticker Sizes   **Backing Paper Sizes**

① Width of 68㎜ x height of 68㎜ → 68㎜ x 100㎜

② Width of 88㎜ x height of 55㎜ → 88㎜ x 55㎜

③ Width of 78㎜ x height of 97㎜ → 78㎜ x 120㎜
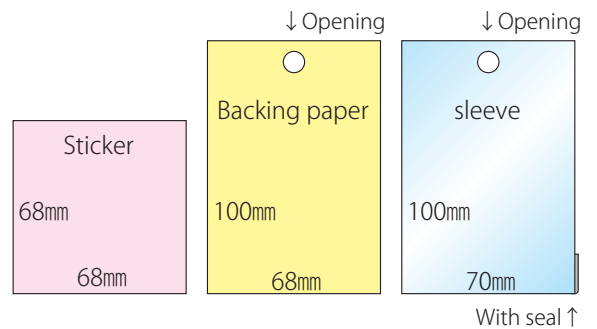

④ Width of 88㎜ x height of 120㎜ → 88㎜ x 150㎜

Note 1: The backing paper for ①, ③, and ④ is longer than the sticker. (It has an extra portion at the top.) The backing paper for ② is the same size as the sticker.
Note 2: Printing on one side/both sides and in color/monochrome is possible.
Note 3: Choosing a backing paper and sleeve for ①, ③, and ④ with a hole or without a hole is possible.

①
- Sticker width of 68㎜ x height of 68㎜
- Backing paper width of 68㎜ x height of 100㎜ (with hole/without hole)
- With sleeve with seal (with hole/without hole)

Data For OEM Nail Stickers

〈How to Create Sticker Data〉

Example: Sticker size ② (width of 88㎜ x height of 55㎜)

Sticker Design

- Leave a gap of 5㎜ from the edge.
- **Leave a gap of at least 3㎜ between designs.**
- Specify the portion you would like to make white or transparent in the design.

〈Example of Specifying〉

white   transparent

- **Pictures that are too detailed, thin lines, small text, and the like cannot be reproduced.**
  (The minimum size of a design is 3㎜.)
- **Outline the text.**

5mm

3mm

3mm

5mm

Cut line

0.5～0.6㎜
(Gap between design and cut.)

Cuts with acute angles cannot be used.

Cut lines are made with curves.
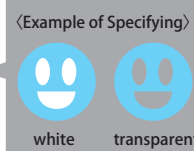

Cut Line

- The sticker is cut on its outer side, around 0.5 to 0.6㎜ from the design's edge.
- The cut line is made at ING KAWAMOTO.
- Cut lines with acute angles cannot be used (see example at left).

If Placing an Image in Illustrator

- Check the "Place with Link" option.
  Note: Also send the placed image to us with the data.
- Resolution of the placed image is 600dpi at actual size.
- Cut out the placed image with a clipping path or make transparent the placed image's background.

The background portion must be transparent.
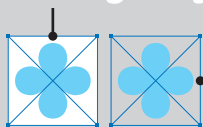

If placing an image, make transparent the original image's background.

- Use CMYK or gray scale for the color mode. If created with RGB mode or in double tone, there will be a difference between what you see on your screen and the finished item.

Data Version

- Compatible with versions up to CC.

If Making Only with Photoshop

- The resolution must be 600dpi.
- The color mode must be CMYK or gray scale.
- If text is entered in Photoshop, rasterize the text.
- Make transparent the portions that do not have a design on them.
  Note: If using Photoshop data, thin lines might not be clearly output, compared to when using Illustrator data.

Make transparent the portions that do not have a design on them.
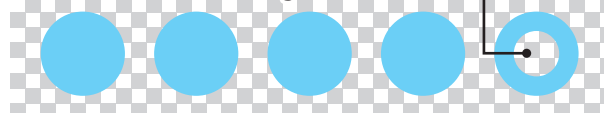

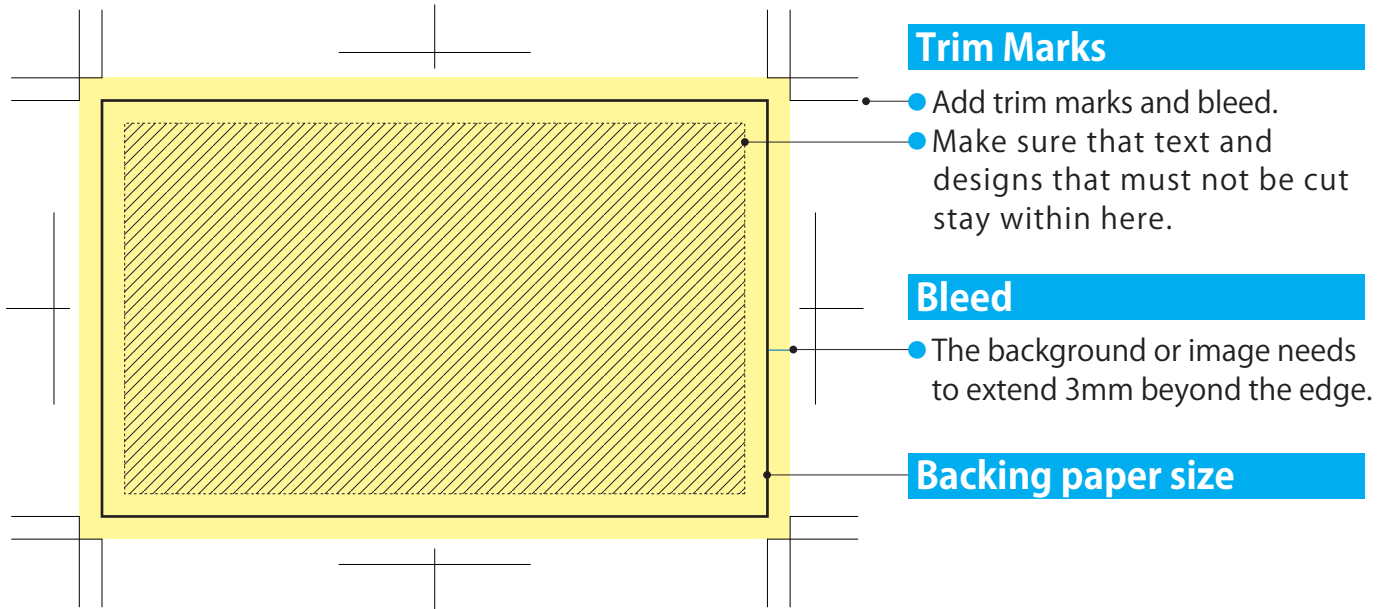

If Using a Hand-Drawn Pictures

- Scan with a resolution of 600dpi at actual size.
- Use CMYK for the color mode.

Note: If you send the original picture, scanning can be carried out at ING KAWAMOTO, but a separate fee will be charged. Please check this fee at the time of ordering.

If data is found to be inadequate, please re-send it to us.

Backing Paper Data for OEM Nail Stickers

〈How to Create Backing Paper Data〉

Example: Backing paper size ② (width of 88㎜ × height of 55㎜)

Trim Marks
- Add trim marks and bleed.
- Make sure that text and designs that must not be cut stay within here.

Bleed
- The background or image needs to extend 3mm beyond the edge.

Backing paper size

Illustrator Data
- Check the "Place with Link" option.
  Note: Also send the placed image to us with the data.
- Resolution of the placed image is 350dpi at actual size.
- Use CMYK or gray scale for the color mode. If created with RGB mode or in double tone, there will be a difference between what you see on your screen and the finished item.
- Before placing the image, change the mode to CMYK mode in Photoshop.
- **Outline the text.**

If Making Only with Photoshop
- The resolution must be 600dpi at actual size.
- Use CMYK for the color mode.
- If text is entered in Photoshop, rasterize the text.

Data Version
- Compatible with versions up to CC.
